Detailed Office Action

1. This action is in response to the application 09/976058 filed. **October 15, 2001**
2. Claims 1-4 have been examined.

Specification

3. The abstract of the disclosure is objected to because no more than one paragraph is allowed in the abstract. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Regarding claim 1, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention.

See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

6. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Leighton et al. (USPN 6,553,413– Date of Patent: April 22, 2003, herein referred to as “Leighton”).

7. As to claim 1, Leighton teaches the invention as claimed, including in the invention of an ISP appliance that will enable Internet Service Providers to get their business started without concern for technology (44 Fig.3) (see col.13, line 39 to col.14, line 40, and col.15, line 60 to col.16, line 23).

Art Unit: 2144

8. As to claim 2, Leighton teaches the invention as claimed, wherein the ISP appliance is the first ever complete and total solution like this for deploying all Internet services that an ISP will sell to it's customer base (col.2, lines 10-23, and col.15, line 65 to col.16, line 10).
9. As to claim 3, Leight teaches the invention as claimed, including creation of a concept labeled nodularity, such that each technical business function of an Internet Service Providership can be contained within a node and each such node can be expanded (See col.13, line 39 to col.14, line 7, and col.14, lines 10-40).
10. As to claim 4, Leighton teaches the invention as claimed, wherein currently the invention of a core, services and access node that enables Internet Service Providers to become operational more quickly than ever before (see col.13, lines 39-63 and col.14, lines 30-40).
